

## Anderson County School District 2 and 3 Bundled Energy Solutions

Anderson County School District 2 and 3 in South Carolina enlisted ABM's Bundled Energy Solutions (BES) program to provide energy efficient upgrades and facility enhancements to eleven schools within the county.

Due to limited funds, the school districts were unable to make needed improvements to the students' learning environment as their primary focus was on enhancing the educational curriculum.

ABM offered the school districts a customized solution that provides general fund relief and allows for needed infrastructure improvements. In District 3, upgrades were made to three elementary schools, the middle school, the high school and Board of Education building. With District 2, enhancements were made to three elementary schools, two middle schools, the high school and the primary school.

Both projects combined are estimated to save Anderson County School District 2 and District 3 over \$6 million in energy and operating costs over a 15-year period.

### CHALLENGE

To make district-wide, critical infrastructure improvements without placing burden on the general fund

### SOLUTIONS

- Energy and facility improvements made to 11 schools in the districts and two additional educational facilities
- HVAC system upgrades, installation of LED lighting, energy efficient transformers
- Installation of electric hand dryers and water conservation measures

### BENEFITS

- Guaranteed savings of over \$6 million in energy and operating costs over the next 15 years
- Improved indoor air quality in school buildings and reduced humidity challenges in the elementary school's gym in District 3
- Enhanced the overall sustainability of the school districts' buildings

“With ABM’s solution we don’t have to select between student-focused initiatives and improving our infrastructure,” said Dr. Mason Gary, Superintendent for Anderson School District 3.
