

Electrical & Lighting

Services Offered

- LED Retrofits & High-Efficiency Lighting Improvements
- Lighting Repairs, Replacements & Upgrades
- Predictive and Preventive Lighting Maintenance
- Advanced Controls Installation & Certification
- Energy Saving Retrofits & EV Charging Stations

What's a Good Lead

- Client has in-house or outsourced lighting and electrical personnel but they spend too much time "chasing" lighting outages
- Equipment is in poor visible condition – missing lenses, burned out fixtures, removed and different color lamps, rusted light pole bases, and dirty fixtures
- Increasing energy costs, CAM charges are not competitive
- Dark areas on the property that are not secure or safe
