Semiconductors are America's #4 Export

Directly Employing 1/4 Million
Indirectly Employing 1 Million

R&D cost of staying competitive in a $420 billion semiconductor market:
1/5 of revenues

Developing wide bandgap semiconductors could change computing:
- Cutting processor energy use by 20%
- Reducing processor heat energy waste by 90%

Threatening R&D dollars, semiconductor manufacturing now:
- Consumes cleanroom time per batch over 6-8 weeks
- And eats the energy budget of 50,000 homes
- Totaling 30% of operational budgets
- 50% of which is cleanroom HVAC

Protect your R&D with operational cost controls in:
- Cleanroom Cleaning
- Energy Solutions
- Labor Management

See what all three can do for you:
