

Once-a-Year Parking Garage Must-Have Safety Checklist

- Check that **gates** are visible, functional, and open automatically when cars approach or when there is a loss of power.
- Identify **blind spots** and ensure either a STOP sign or mirror is posted there.
- Make sure **vegetation** is trimmed away, both for visibility and surface integrity.
- Identify **tripping hazards** and repair or highlight.
- Check that **slip-resistant surfaces** are intact.
- Are **storm water control systems** in place and functional?
- Review **ADA compliance** for signage, ramp incline, and parking spot width.
- Are **bicycle/motorcycle areas** well-marked and safe from oncoming traffic?
- Check for **accumulation** of water, snow, and debris.
- Are **support columns** intact? No cracking?
- Is all **lighting** functional and up-to-date with LED bulbs?
Are there any dark areas?
- Are **emergency call boxes** present, visible, and functional?
