

# Life Cycle of a Pallet

In our hands, pallets stay in-use or out of your way. ABM manages the entire pallet process from arrival to disposal, so your staff can focus on keeping products moving.

**STEP 1:**  
Pallets arrive  
with products.

**STEP 2:**  
We pre-assess  
damage to avoid  
mishaps.

**STEP 3:**  
Pallets are  
unloaded by  
your teams.

**STEP 4:**  
We clear empty  
pallets and any  
debris quickly.

**STEP 5:**  
Empty pallets are  
checked and sorted  
for in-house use  
or return.

**STEP 6:**  
Pallets are reused  
efficiently, always  
ready when and  
where your team  
needs them.

**STEP 7:**  
Pallets are  
periodically  
monitored  
for damage.

**STEP 8:**  
Pallets at the end  
of their life are  
either recycled or  
disposed of.
