

The 3 C's of Preventing Electrical Power Incidents

Avoid the costs of serious electrical incidents by addressing the causes with proactive and comprehensive care.

Fatal electrical injuries increased by 18% from 2017 to 2018.¹

Costs You Can Avoid

\$12-15M

Total costs of a single arc flash incident²

19 Days

Average hospitalization after an arc flash incident³

\$1-5M

The cost of downtime per hour for 33% of businesses⁴

Causes You Can Prevent

56% of all electrical fire losses can be attributed to a lack of preventive maintenance.⁵

Improper PPE

Incomplete training

Incorrect installation

44% other causes

Comprehensive Solutions You Need

Proactive electrical maintenance prevents safety incidents. Look for a provider who meets these criteria:

NETA Accreditation

NFPA 70E Expertise

Third-Party Certified Engineers

Compliant Safety Program

Prevent the Costs by Focusing on the Causes.

ABM has the experience and expertise to protect your people and equipment.
