

EnhancedClean Pathogen Control for Occupant and Building Wellness

A holistic approach to creating healthier buildings

There is a heightened sense of scrutiny for demonstrating that you are doing your part to provide clean, healthy, and safe environments. As your facilities return to normal occupancy levels, providing peace of mind is vital. ABM is uniquely positioned to help our clients prevent the spread of pathogens through a three-tiered approach to building disinfection.

Beyond maintaining cleanliness, ABM's EnhancedClean program can help you assure occupants that you're doing your part to create healthier spaces – whether it's upon reopening comprehensively, disinfecting more frequently, or responding to emergent situations.

Determining the Right Approach at the Right Time

Every building is unique, but what all facilities have in common is the ongoing need for preventative practices and regular disinfection to improve the health and wellness of the building and its occupants.

We can help you meet the evolving challenges of reentry and ongoing facility services, supplemented by broad disinfection technologies to cover every angle of building wellness.

	Suggested Service Frequency	Methods Employed	Team Members Deployed	Potential Supplies and Equipment	Other Features and Benefits
Facilities Reentry Services	<p>Pre-opening site assessment(s).</p> <p>One-time deep clean using EPA-registered disinfectants, or in intervals of reentry.</p>	<ul style="list-style-type: none"> Plan return to work strategy Follow reopening checklist Workforce protocols (i.e. PPE & social distancing procedures) 	Trained disinfection specialists.	<ul style="list-style-type: none"> Reentry protocol communications & signage Touchless automated restroom equipment No touch fixtures, dispensers & door openers Hand-sanitizing stations Centralized trash receptacles Sensor technologies 	Comprehensive site assessment to reduce transmission potential.
Enhanced Scope Services	Intervals range from hourly to daily to curb community spread of pathogens.	<ul style="list-style-type: none"> Site-specific SOW for each facility type per occupancy levels and traffic patterns Disinfection of all high touch point areas in facility Implement preventative products strategy Indoor air quality strategy 	Trained disinfection specialists.	<p>Ongoing use of:</p> <ul style="list-style-type: none"> EPA-registered disinfectants Proper PPE Microfiber program 	<p>Improved frequency, visibility, and efficacy of cleaning program through increased staff and scope.</p> <p>Other services such as Engineering, HVAC and Parking offer opportunities for enhanced pathogen prevention as well.</p>
Holistic Disinfection Services	Intervals range from weekly to quarterly to provide more thorough and broader surface coverage to complement the increased frequencies from scope enhancements.	<ul style="list-style-type: none"> Full building/large area disinfection Comprehensive wipe down of high-touch surfaces with stronger EPA-registered disinfectants Enhanced equipment and technology Evidence-based testing devices to validate disinfection procedures 	Trained teams in more specialized disinfection equipment and technologies.	<ul style="list-style-type: none"> Electrostatic sprayers Contamination awareness technology MERV-14 high efficiency air filters <p>Continued product testing:</p> <ul style="list-style-type: none"> UV devices and UVC lighting Antimicrobial and environmental coating solutions Indoor air quality testing devices Robotic disinfection machines 	Expert certified program and services.
