

Interdisciplinary Expertise That Helps Deliver Healthy Spaces

Our Expert Advisory Council, composed of leading experts in infectious disease, industrial hygiene, and facility services, advises on many aspects of ABM's business, including our proprietary EnhancedClean™ and EnhancedFacility™ programs and provides independent third-party perspective to support ABM in the value we deliver to clients. This includes continued efforts to maintain consistent, high quality standard operating practices; offer clients the latest equipment and technologies for infection control; and equip our team members with accredited training programs and internal certifications.

Dr. Ruth Carrico, PhD, DNP, FNP-C, FSHEA, FNAP CIC

Dr. Carrico is Professor and Director of the Global Health Initiative and Director of Epidemiologic Research for the Center of Excellence for Research in Infectious Diseases (CERID) at the University of Louisville School of Medicine. She received training specific for healthcare epidemiology at the Centers for Disease Control and Prevention (CDC) in conjunction with the Rollins School of Public Health at Emory University in Atlanta and the Society for Healthcare Epidemiology of America (SHEA). She has authored or co-authored numerous peer-reviewed manuscripts and industry-leading publications. She has served on the Association for Professionals in Infection Control and Epidemiology, Inc. (APIC) National Board of Directors, served as President of the Certification Board for Infection Prevention and Control (CBIC), was a two-term member of the CDC's Healthcare Infection Control Practices Advisory Committee (HICPAC), and has been in key positions with numerous other industry-leading national and international organizations.

Nancy M. McClellan, MPH, CIH, CHMM

Ms. McClellan is the current Chair of the University of Michigan School of Public Health External Advisory Board. She is the CEO of Occupational Health Management, PLLC industrial hygiene consultancy. She has served on the Boards of Directors for the American Industrial Hygiene Association, the Occupational Hygiene Training Association, and the American Board of Industrial Hygiene throughout the past 15 years. Prior to her consulting career she was the Global Industrial Hygiene Manager for both AbbVie pharmaceutical and LafargeHolcim cement company where she developed and implemented occupational health and safety programs. She has consulted to over 215 organizations including pharmaceutical, healthcare, automotive, food, construction, public-sector organizations, as well as the US military, ensuring workers return home as healthy as they arrived at work.

Interdisciplinary Expertise That Helps Deliver Healthy Spaces

Cathy Campbell, National Director of Service Delivery, ABM; CHESP, CMIP

With over 25 years of experience in the development and implementation of infection prevention programs, Cathy has contributed to product innovations, sustainability efforts, and technical training. Cathy earned her bachelor's degree in Healthcare Administration and Applied Management and later received a Certificate of Mastery in Infection Prevention from The Association for the Healthcare Environment (AHE). She established herself as a subject matter expert for Healthcare Environmental Services during her career in a variety of roles focused on standardized work programs.

Gordon Buntrock, National Director of Service Delivery, ABM

Gordon has over 40 years of experience in the development of cleaning systems, program management, and operations experience in the cleaning business. He has been recognized nationally for his expertise on cleaning processes, cleaning systems integration, supplemental infection prevention technologies, production standards development, and his ability to train and motivate management and service staff to drive productivity and efficiency. He is also recognized for innovation in the cleaning business and his expertise on interiors solutions.

Kevin Brown, Vice President, Engineering, ABM; PE, EMP, HBDP, CEM, CMVP, LEED AP

With 25 years of experience in developing mechanical retrofit projects, Kevin leads a team of energy engineers and project developers with a combined goal of finding funding solutions to solve clients' needs. He has produced more than \$1 Billion in performance contracts in the Municipal, University, School and Hospital (MUSH) markets as well as in the Federal Government market. Kevin holds a degree in Aerospace Engineering from Auburn University. He serves on the board of the Energy Management Association (EMA) and several technical and standards committees for the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

The Council advises on the guidance and development of:

Standard Operating Procedures

Reviews and validates all SOPs relevant for ABM's COVID-19 response and EnhancedClean and EnhancedFacility offerings

Program Certification Build

Defines approach for program certification and validates disinfection specialist certification and training program

Program Development and Technology Vetting

Develops the framework for implementing Evidence Based Testing (ATP) and product vetting for UV light and HVAC disinfecting technologies

Position Paper Development

Develops, documents, and reviews ABM's position on key topics, such as indoor air quality, electrostatic sprayers, UV disinfection, and antimicrobial coatings
