

ENHANCEDFacility™

Ensure Safer, Healthier Spaces

Restore Confidence by Ensuring Healthy Air Indoors

Chances are you took re-opening your facilities mid-pandemic seriously. You likely have ongoing plans that include protocols for cleaning, surface disinfection, social distancing, hand hygiene, and more. However, mounting research suggests that COVID-19 droplets may remain in the air and could be a primary source of transmission¹. Have you put measures in place to reduce the spread of pathogens in the air? ABM's **EnhancedFacility™** program can help.

ABM's EnhancedFacility program provides facility services and solutions focused on improving indoor air quality (IAQ) to foster better occupant wellbeing through improved building health, safety, and efficiency. We can help you implement effective strategies you need to improve IAQ to help reduce viral transmission.

How EnhancedFacility Works

Our Expert Risk Assessment and Control Banding Process

Using our proprietary Healthy Building Risk Banding Tool developed alongside our Expert Advisory Council, we can assess and identify IAQ challenges and recommend effective and cost-efficient solutions.

First, your facility's exposure risk is categorized

Using our proprietary Healthy Building Risk Banding Tool, your facility's overall risk level is identified (low to very high).

Then, the highest priorities to each facility are identified

The most important and effective strategies for your facility's specific risk level are determined.

Lastly, targeted solutions based on risk level are developed for maintenance, lighting, and HVAC systems

A report of fact-based recommendations help you form a comprehensive strategy for reopening and operating more safely.

Healthier Facilities, Healthier Occupants

There are several new and advanced technologies for biohazard disinfection of the air and surfaces that may be effective depending on the unique needs of the facility, including Needlepoint Bipolar Ionization technology within HVAC systems, Dry Hydrogen Peroxide Generation, and Far-UV and UV-C lighting technologies. These specific recommendations help prioritize budgets to focus on actions that will make the most impact.

ABM can also help with funding options. We have access to public and private loan programs which could be paid for by savings realized with a Professional Service Agreement (PSA).

EnhancedFacility complements the cleaning and disinfection offered in **EnhancedClean™** (visit [EnhancedClean.com](https://www.enhancedclean.com) for more). Together, they help reduce viral transmission on surfaces and in the air. Additional services like the installation of touchless fixtures and doors will also lower your facility's risk. These programs foster greater occupant trust and confidence regarding your commitment to their health and safety, during the pandemic and beyond.

LET'S STAY
**HEALTHY
TOGETHER.**

Take the next step towards a healthier, safer space for your occupants – schedule your Healthy Building Risk Assessment today.

About ABM

ABM (NYSE: ABM) is a leading provider of facility services in the United States and various international locations. ABM's comprehensive capabilities include janitorial, electrical & lighting, energy solutions, facilities engineering, HVAC & mechanical, landscape & turf, mission critical solutions and parking, provided through stand-alone or integrated solutions. ABM provides custom facility solutions in urban, suburban and rural areas to properties of all sizes - from schools and commercial buildings to hospitals, data centers, manufacturing plants and airports. ABM Industries Incorporated, which operates through its subsidiaries, was founded in 1909. For more information, visit [ABM.com](https://www.abm.com).
